**RE: Public Records Request – Columbia Gulf Transmission
Pipeline Risk Analysis and Site Scoring Asymmetry in WWTP
Site Selection**

Dear Ms. Santana,

Pursuant to the Tennessee Public Records Act (T.C.A. § 10-7-503 et seq.), I am requesting copies of all documents in the possession of the City of Lebanon relating to the Columbia Gulf Transmission interstate natural gas pipeline system and its bearing on the evaluation of candidate sites for the proposed new 20 MGD Wastewater Treatment Plant — including the analysis that informed the city's deprioritization of the Rockwood site on pipeline grounds at the March 19, 2026 working session.

Specifically, I am requesting:

1. All records — including engineering reports, consultant memoranda, easement analyses, or staff reports — prepared in connection with the city's determination that the Columbia Gulf Transmission pipeline easement limited the usability of the Rockwood site (Site 13), including the analytical basis for that determination as presented or referenced at the March 19, 2026 working session.
2. All records of the March 19, 2026 working session itself, including meeting minutes, agenda, presentation materials, and any staff or consultant reports distributed at or in advance of that meeting.
3. All records showing whether the Columbia Gulf Transmission pipeline risk analysis or easement evaluation applied to the Rockwood site was also applied to any other candidate site — including Sites 1 through 7 along Mann Road, Berea Church Road, Maple Hill Road, and Coles Ferry Pike.
4. All pipeline routing maps, alignment sheets, easement plats, GIS data exports, or right-of-way records obtained by or for

the City of Lebanon showing the routing of Columbia Gulf Transmission Mainlines 100, 200, and 300 relative to any candidate site parcel.

5. All records obtained from Columbia Gulf Transmission, LLC, the Federal Energy Regulatory Commission (FERC), or the Pipeline and Hazardous Materials Safety Administration (PHMSA) regarding the pipeline route, easement width, depth-of-cover, maximum allowable operating pressure, last inspection date, or class location status for any segment crossing or adjacent to a candidate site.
6. All correspondence between the City of Lebanon, its engineering consultants, Columbia Gulf Transmission, LLC, FERC, or PHMSA regarding the Columbia Gulf pipeline alignment in connection with the WWTP site selection process.
7. All emergency response plans, mutual aid agreements, or coordination records between the City of Lebanon Fire Department and Wilson County Emergency Management addressing pipeline incidents along the Columbia Gulf alignment in Wilson County.
8. All records addressing whether pipeline proximity, easement constraints, or pipeline-related risk factors were applied as a scoring criterion or deprioritization factor for any candidate site other than Rockwood.

Please provide the responsive records in electronic format if available. If any portion of this request is denied, please provide a written explanation citing the specific statutory exemption relied upon. If any responsive record contains both exempt and non-exempt information, please redact the exempt portions and provide the remainder. Please do not withhold an entire record solely because a portion of it may be exempt.

I am willing to pay reasonable copying or processing fees. Please notify me in advance if the estimated cost exceeds \$25.00.

Thank you for your assistance. Please feel free to contact me with

any questions.

Sincerely,

Ryan Todd Roark
